

Spray Park almost ready

The Spray Park is almost ready for summer.

The Golden Spray Park Committee would like to sincerely thank the construction crews who have brought their dream to reality. The construction phase of this project is now complete, and with the health and safety of our young ones in mind, the inspection of the equipment is currently underway and any defective parts are being replaced or repaired. While it is difficult to predict the length of this process, the Committee anticipates they will receive the green light for operation near the end of June.
